

Percent of Change Project

Use store ads to investigate % of change in the real world.

1. Divide the class into groups of 4.
2. Assign roles:
 - a. time keeper - keeps the group on task
 - b. scribe - writes up findings for the group on a single sheet
 - c. creative consultant - designs presentation poster
 - d. presenter - presents group's findings to the class
3. Each group must find 4 items in store ads. Each member of the group must work on a different item.
 - a. 2 items that involve a % discount
 - b. 2 items that involve a price change
4. On the % discount items, they must determine the new price or verify that the new price in the ad is correct.
5. On the price change items, they must determine the amount of discount and the % of change.
6. For the presentation: the group must create a poster of one of the items to present to the class.

Grading:

Item with correct calculations 5 points each

Presentation poster:

Title	1 point
Ad	1 point
Calculation	1 point
Conclusion	1 point

Total	19 points
